

Universities at the Crossroads

Universities at the Crossroads traces the evolution of India's university system, and examines the diverse roles that this institution is expected to perform—to strive for academic excellence while creating social equality in a hierarchical society. In a lucid and deft style, Andre Beteille argues that policies use the university as an agency of social change without considering the consequences, thus pushing the limits of the university's resources. This diverts it from its primary objective of scholarship. Engaging with education planners and administrators, Beteille comments that indiscriminately setting up more universities and producing more graduates will not ensure quality education and social equality and this awareness must inform educational policy planning. This volume is a crucial addition to the current debates about the quality of higher education and the fraught subject of reservations.
